

CITY ON A HILL

PA Team Member role profile

Introduction to the PA Team

We love to be together as our Community for our regular Gatherings. To help facilitate the Gatherings we have a variety of Teams that work together to create a space for people to meet with God and to build relationship with one another.

The PA Team does this by setting up, running, and taking down the PA system in such a way that worship and the word are elevated, clear, comfortable, and intelligible for all resulting in the system and those serving fading into the background. This comes through not just building upon one's own skill and knowledge base and putting it into practice but also through working together with and supporting the worship team and those speaking in the gathering through clear communication in an honest, respectful, and gracious manner.

What are the key responsibilities of the PA Team Members?

- Set up, run, and take down the PA system.
- Liaise with Gatherings Leader, worship team, and speakers to gain an understanding of all parts of the gathering paying particular attention to transitions.
- Mix the gathering from the PA desk seeking clear, comfortable, and intelligible audio that is fitting of the context as well as smooth transitions at all points.
- Report any issues related to gear or lack of training to the PA Leader.
